Work Experience

Product Technical Specialist II

Vertex Inc – King of Prussia, PA

September 2022 – Present

- Provide second level support for moderately complex issues that were not resolved by tier 1.
Specifically, troubleshooting in the areas of product functionality, data, calculation, and integration issues
- Analyze XML and JSON for resolutions to root cause of calculation issues
- Analyze and collect customer data: log files, stack traces, thread dumps, etc.
- Resolve calculation engine issues utilizing API tools(Postman, SoapUI)
- Troubleshoot errors employing Chrome DevTools
- Reproduce customer issues, file bug reports and future enhancements in JIRA
- Utilize SSMS and SQL to update and query client's databases to resolve possible data issues
- Collaborate on internal projects and teams with development and tax research

Technical Support Representative

Assetworks – Wayne, PA

July 2021 – September 2022

- Contribute to knowledge base articles and drive internal knowledge sharing
- Install, configure and troubleshoot hosted client's M5 application and servers
- Analyze and collect customer data: log files, stack traces, thread dumps, etc.
- Configure IIS to integrate additional web applications as needed

- Reproduce customer issues, file bug reports, coordinate the delivery of fixes and manage the end-to-end process
- Use SQL developer and SSMS to update and query client's databases to resolve errors
- Provide escalated technical support to customers and partner with cross-functional teams on high profile technical issues while providing feedback and leadership to our product support team

Technical Support Representative

Firsttrust Bank – Whitemarsh, PA

December 2019 – July 2021

- Closed second most tickets within my department last year
- Create SQL queries for inventory reporting and deployment
- Provide support by handling incoming calls or tickets created in the BMC RemedyForce Console
- Dissect and troubleshoot issues that occur in banking applications from user logon problems to software issues that happen from upgrades or user error
- Maintain and update documentation for banking application troubleshooting
- Contact vendors to resolve errors with software as needed
- Manage VOIP accounts and problems related to VOIP
- Install and create connections in SSMS and create ODBC data sources

Support Technician II

Covetrus - Feasterville-Treose, PA

December 2018 to December 2019

- Provide support by contacting and communicating with clients when data issues arise
- Maintain and upgrade Covetrus software by remoting into client's server and supporting either the vixfer, vetlogic, and the vetdata client or a combination of the three
- Maintain and update documentation for software and any relevant issues that arise
- Troubleshoot Windows OS issues and Mac OS issues so that our software works properly (group policy, registry issues, cron jobs, etc.)
- Utilize CRM to track interactions with clients and cases that are currently being worked on
- Use Jira or Azure DevOps to track tickets and escalate issues to the right departments
- Make exceptions in anti-virus and confirm the correct ports are unblocked

Computer Technician's Assistant

Bucks County Community College - Newtown, PA

August 2017 to December 2018

- Deploy networked computers and peripherals
- Repair or place hardware in computers when they failed
- Fix software issues using documentation
- Resolve printer issues
- Provide technical support to students, faculty and staff
- Troubleshoot Windows or Mac OS issues
- Use FOG for imaging computers
- Resolve user issues utilizing active directory (reset passwords, unlock accounts, etc.)
